INTRODUCTION

Here is a truly outstanding collection of tunes for you to learn, with the emphasis on melody. Written over a span of thirty seven years, these songs all fall within the great popular song tradition, though they have been written by composers with widely varying backgrounds. As usual, jazzmen over the years have added their own performing tradition to many of these tunes.

The earliest tune on the album is one of the most recorded ever *Star Dust*. Hoagy Carmichael once claimed that he didn't write it, he discovered it. Initially it was played as a "smart fox trot", but when it was slowed down it gained rapid popularity, especially with trumpet and saxophone players. The track on this album includes the verse, which has had increasing popularity with musicians over the years in fact, a couple of recordings have been made of the verse by itself!

Sweet Lorraine has been especially popular with pianists, no doubt beguiled by the harmony of the bridge. *I'm Gettin' Sentimental Over You* is easily George Bassman's best known composition though he wrote extensively for films & television after doing freelance arranging for Ellington, Henderson & Chick Webb as well as Andre Kostelanetz! Incidentally, with your own group try substituting the "Turnarounds Final" chords from Aebersold Vol. 16 for the first 16 bars for an interesting alternative. *Ghost of A Chance* was written by Victor Young, who also wrote *Stella By Starlight*, *Weaver of Dreams*, *My Foolish Heart* and many other hits. Young wears his heart on his sleeve, and the present tune is no exception. Frank Perkins, whose one big hit was *Stars Fell on Alabama*, worked for many years as a composer/arranger/conductor for Warner Brothers, winning an Oscar nomination for his scoring of "Gypsy" in 1962. *When Lights Are Low* is the best known piece by Benny Carter, the only jazzman-composer represented in this collection. The tune wasn't too well known until Miles Davis recorded it in the early fifties with the wrong bridge. Miles apparently couldn't remember the original, so he took the main strain up a fourth as a substitute. Miles' influence is such that many versions of this tune recorded for a decade or so after Miles' recording were done this way. The original, correct, version is played here and the discography page lists those recorded versions which contain the correct bridge. *Easy Living*, the title tune from a long-forgotten movie, has been very popular with jazzmen over the years. There is even an earlier play-a-long version (Aebersold Vol. 22).

In the post war era, Leroy Anderson arose as a composer of light symphonic fare such as *Sleigh Ride*, *The Syncopated Clock*, etc. as an important part of his affiliation with the Boston Pops. Lyric writer Mitchell Parish (who wrote words for four tunes in this collection) turned Anderson's *Serenade* into a popular tune, and a number of jazzmen have found it to be an attractive vehicle. Jerry Brainin wrote his only film score in 1948, but except for an out of print Horace Silver recording in 1956 the title song *The Night Has A Thousand Eyes* lay undiscovered by jazzmen until John Coltrane recorded it in 1960. Some caveats: Trane took some liberties with the melody, so an extra page with the original melody (with Buddy Bernier's lyrics) has been included in this booklet for vocalists; Trane's Giant Steps changes in the bridge have not been used on most other recordings, so they do not appear on this recording. Also, Brainin and Bernier's tune is not to be confused with the Bobby Vee hit with the same title, which came out at about the same time as Coltrane's recording. Talk about coincidences!

Jimmy McHugh had a long composing career with credits including *On the Sunny Side of the Street*, *I'm In the Mood for Love*, and *Exactly Like You*; his last big hit capitalized on the latest teen phenomenon in 1955. Though Nat King Cole usually didn't draw a teen audience, *Too Young to Go Steady* made a respectable dent in the pop charts. Once again, it was John Coltrane who saw the jazz possibilities in a piece of seeming ephemera; he recorded it on his Ballads album in the early sixties. *Mr. Lucky* was the theme of one of several TV shows that Henry Mancini wrote. Mancini's success in writing jazz-tinged scores for films and television has been echoed in the work of Johnny Mandel, who played in and arranged for big bands in the forties. He wrote compositions for Woody Herman and Stan Getz before turning to work on films like *The Sandpiper*, *The American Dream* and *The Americanization of Emily*, from which *Emily* derives.

This collection of a dozen tunes ranges from the "mustlearns" to some relatively obscure pieces, and all of them will provide plenty of interesting challenges.

NOMENCLATURE

+ or # = raise 1/2 step

H = Half step

- or b = lower 1/2 step

W = Whole step

Because jazz players, composers, educators and authors have not agreed on a common nomenclature for writing chord and scale symbols, the novice will have to become familiar with several different ways of writing the same scale sound.

Listed below are the most common symbols in order of usage – most used to least used. The symbol that is bold face is the one I use most often. Notice that throughout this book you will see CΔ and C to designate a major chord/scale sound. I am doing this so you can begin to get acquainted with various nomenclature.

Δ = major scale/chord or major seventh. A 7 after a letter means to lower the 7th note of the scale, making it a Dominant 7th quality. A dash (-) when located beside a letter means to lower the third and seventh of the scale 1/2 step, thus making it a minor tonality (Dorian minor). Ex. C-, F-, Eb-, etc. Ø means half-diminished. C-Δ means a minor scale/chord with a major 7th. -3 means 3 half-steps (a minor 3rd)

<u>CHORD/SCALE TYPE</u>	<u>ABBREVIATED CHORD/SCALE SYMBOL</u>
* MAJOR (Ionian) (WWHWWWH)	C, CΔ, Cmaj, Cma, Cma7, C7, Cmaj7, CM, CM7
* DOMINANT SEVENTH (Mixolydian) (WWHWWHW)	C7, C9, C11, C13
* MINOR SEVENTH (Dorian) (WHWWWHW)	C-, C-7, Cmi, Cmi7, Cm7, Cmin, Cmin7
LYDIAN (Major scale with #4) (WWHWWWH)	CΔ+4, Cmaj +4, CM+4, CΔ+11, CΔb5
* HALF-DIMINISHED (Locrian) (HWWHWWW)	CØ, Cmi7(b5)
HALF-DIMINISHED #2 (Locrian #2) (WHWHWWW)	CØ#2, CØ+2
DIMINISHED (WHWHWHWH)	C°, C°7, C dim 7
LYDIAN DOMINANT (Dom. 7th with #4) (WWWHWHW)	C7+4, C7+11, C7b5
WHOLE-TONE (Augmented) (WWWWWWW)	C7+, C7 aug, C7+5, C7+5⁺⁴
DOMINANT SEVENTH <u>Using a Dim. scale</u> (HWHWHWHW)	C7b9, C7⁺⁹⁺⁴_{b9}
DIMINISHED WHOLE-TONE (Altered scale) (HWHWWW)	C7+9, C7 alt., C7⁺⁹⁺⁵_{b9+4}
LYDIAN AUGMENTED (Major with #4 & #5) (WWWWHWH)	CΔ⁺⁵, CΔ+5⁺⁴
MELODIC MINOR (ascending only) (WHWWWHW)	C-Δ, Cmin(maj7), CmiΔ, C-Δ (Melodic)
HARMONIC MINOR (WHWWH-3H)	C-Δ, CmiΔ, C-Δ(Har), C-Δb6
SUSPENDED 4th (W-3WWHW) or (WWHWWHW)	C7sus4, <u>C-7</u>, C7sus, C4_C
* BLUES SCALE (use at player's discretion) (-3,W,H,H,-3,W) (1,b3,4,#4,5,b7,1)	(There is no chord symbol for the Blues scale)

* These are the most common chord/scales in Western music.

When we speak of quality we mean whether it is Major, Minor, Dim. or whatever. .

I have tried to standardize the scale/chord symbol notation in my books. Since some have been out many years there are instances where I may have used a different chord/scale symbol in one book than I used in this one.

I feel the improviser needs as little notation as possible in order to transcend the actual nomenclature on the page. The more numbers, letters, alterations that appear on the page, the less chance he will have to remove his thoughts from the page and express what he is hearing in his head. I believe in a reduced chord symbol notation system. That is why I prefer C, C7, C-, CØ, C7+9, C7b9. Remember, we are playing a music called jazz, and it contains many altered tones. Once we learn the various alterations and their corresponding abbreviated chord symbol, why keep writing all the alterations beside the chord symbol?

Check out carefully one of my Scale Syllabus pages! Listen to Volume 26 "The SCALE SYLLABUS."

When I write C- or C or C7 it is an indication for a scale (horizontal) as well as a chord (vertical). Jazz has always embraced the 7th's and 9th's of chord/scales so when I write the symbol Ab or E- it means the 7th and 9th (and really all the tones of the entire scale) are playable, useable.

Remember: 2nd's are the same as 9th's, 4th's are the same as 11th's. 13th's are the same as 6th's. Example: key of C. . . the 2nd, D, is the same as the 9th, D. Often a composer will simply write the name of the scale he prefers beside the chord symbol, such as Eb-Δ (melodic minor), F- (phrygian), F- (phry), or GΔ (maj.pentatonic).

INTRODUCTION TO SCALE SYLLABUS

Each chord/scale symbol (C7, C-, CA+4, etc.) represents a series of tones which the improviser can use when improvising or soloing. Scales and chords are the backbone of our music and the better you equip yourself, the more fun you will have playing music. These series of tones have traditionally been called scales.

I list the scales in the Scale Syllabus in the same key (C) so you can have a frame of reference and can compare their similarities and differences. You are urged to write and practice them in all twelve keys.

Be sure to listen to David Liebman soloing on all of these scales in the *Scale Syllabus - Volume 26*. It can really help one's ears to hear what these scales actually sound like with saxophone and piano. His transcribed solos are also available in book form.

This *Scale Syllabus* is intended to give the improviser a variety of scale choices which may be used over any chord --major, minor, dominant 7th, half-diminished and diminished. Western music, especially jazz and pop, uses major, dominant 7th, dorian minor scales and chords and the Blues scale more than any other. Scales and chords used less often are the half-diminished and diminished. If we agree on these five chord/scale families as being the most predominant, then we can set them up as categories and list substitute scales beneath each heading . . . see *Scale Syllabus page*.

Each category begins with the scale most clearly resembling the chord/scale symbol given to the left. The scales are arranged according to the degree of dissonance they produce in relation to the basic chord/scale sound. Scales near the top of each category will sound mild or consonant and scale choices further down the list will become increasingly tense or dissonant. Each player is urged to start with the scales at the top and with practice and experimentation gradually work his way down the list to the more dissonant or tension producing scales. You should work with a new scale sound on your instrument until your ears and fingers become comfortable with all the tones in the scale. Also try singing the scale with your voice. Improvise with your voice over the scale you are learning and then play on your instrument what your voice sang.

Music is made of tension and release. Scale tones produce tension or they produce relaxation. The improviser's ability to control the amount and frequency of tension and release will in large measure determine whether he is successful in communicating to the listener. **Remember** - you, the player are also a listener! Read in **Volume 1 - A New Approach To Jazz Improvisation** for a more detailed explanation of tension and release in melodic development.

Any of the various practice procedures and patterns listed in Volumes 1, 2, 3, 21 or 24 can be applied to the learning and assimilation of any of the scale choices listed in this Scale Syllabus. Needless to say, any scale you want to learn should be transposed and practiced in all twelve keys. The column on whole and half step construction I have listed for each scale on the syllabus should prove helpful when transposing a scale to any of the twelve keys.

For additional information on scale substitution, I recommend *Scales For Jazz Improvisation* by Dan Haerle, *Jazz Improvisation* by David Baker, *Patterns for Jazz and Complete Method for Jazz Improvisation* by Jerry Coker, the *Repository of Scales & Melodic Patterns* by Yusef Lateef and the *Lydian Chromatic Concept* by George Russell. These books are available from Jamey Aebersold, 1211 Aebersold Drive, New Albany, IN 47150 U.S.A. or possibly at your local music store.

Several play-a-long sets offer you an opportunity to practice the various scales in all twelve keys. They are: **Vol. 24 - Major & Minor; Vol. 21 - Gettin' It Together; Vol. 16 - Turnarounds, Cycles & II/V's; Vol. 42 - Blues In All Keys and Vol. 47 - "Rhythm" In All Keys.**

SCALE SYLLABUS

LEGEND: H = Half Step, W = Whole Step, Δ = Major 7th, + or # = raise H; b or - = lower H; Ø = Half-diminished; -3 = 3H (Minor Third)
 CHORD/SCALE SYMBOL SCALE NAME

CHORD/SCALE SYMBOL	SCALE NAME	W & H CONSTRUCTION	SCALE IN KEY OF C	BASIC CHORD IN KEY OF C
C7	Major	W W W W W H	C D E F G A B C	C
C-	Dominant 7th	W W W W W H	C D E F G A Bb C	C7
CΔ	Minor (Dorian)	W W W W W H	C D E F G A Bb C	C7

SCALE NAME	W & H CONSTRUCTION	SCALE IN KEY OF C	BASIC CHORD IN KEY OF C
Diminished (8 tone scale)	W W H W W H	C D E F G Ab Bb C	C7

NOTE: The above chord symbol guide is my system of notation. I feel it best represents the sounds I hear in jazz. The player should be aware that each chord symbol represents a series of tones called a scale. Even though a C7+9 would appear to have only a raised 9th, it also has a b9, +4 & +5. The entire C7+9 scale would look like: Root, b9, +9, 3rd, +4, +5, b7 & root (C, Db, D#, E, F#, G#, Bb, C). My chord symbol abbreviation is C7+9 and the name of this scale is Diminished Whole Tone sometimes called Super Locrian or Altered Scale. C7b9 appears to have only one altered tone (b9) but actually has three: b9, +9 and +4. The entire scale looks like this: Root, b9, +9, 3rd, +4, 5th, 6th, b7 & root (C, Db, D#, E, F#, G, A, Bb, C). This is called a Diminished scale and my chord symbol abbreviation is C7b9.

All scales under the Dominant 7th category are scales that embellish the basic Dominant 7th sound. Some scales provide much more tension than the basic dominant 7th sound and require practice and patience to grasp the essence of their meaning. I encourage you to work with the first side of Volume 3 "The II-V7-I Progression" since it emphasizes Diminished and Diminished Whole Tone scales and chords.

* - In category #3, MINOR SCALE CHOICES, the PURE MINOR scale choice is not used very often. I have found the order of preference to be Dorian, Bebop, Melodic, Blues, Pentatonic, and then any of the remaining Minor scale choices.
